EDUCATION		
University of Liberal Arts Bangladesh (ULAB) B.Sc. in Computer Science & Engineering (Final Semester) Academic Standing: CGPA 3.10 / 4.00. Specializing in Artificial Intelligence, Backend AI Systems & Algorithms.		Dhaka, Bangladesh Jan 2022 — Present
AWARDS & COMPETITIONS		
Dhaka Regional Finalist ICPC Dhaka Regional Contest 2nd Runners-up Take-off Programming Contest Hosted By ULAB Computer Programming Club Certificate of Participation IUT 11th National ICT Fest		2023, 2024 2023 2024
TECHNICAL SKILLS		
Languages:	C++, Python, SQL, JavaScript, Java, PHP, Bash	
Backend & APIs:	FastAPI, Flask, RESTful APIs, Asynchronous Python (asyncio), Uvicorn, PostgreSQL, API Integration	
AI & LLM Systems:	Model Context Protocol (MCP), Claude API, Gemini API, Tool Calling, Agentic AI (ReAct), RAG, PEFT/LoRA, 4-bit Quantization	
Data, Vision & Annotation:	Bounding Box Annotation, PDF Layout Analysis, Dataset Curation & RLHF, MediaPipe, WebAssembly, PyTorch, NumPy	
Databases & DevOps Tools:	MySQL, SQLite, PostgreSQL, Git, GitHub Actions, Docker, Postman, Linux/Bash, Jupyter Notebook, LaTeX	
PROFESSIONAL EXPERIENCE		
FlyRank AI Backend AI Engineer — Intern Architected an enterprise usage metering and quota enforcement engine using FastAPI and PostgreSQL, implementing exact integer micro-dollar pricing, guaranteed exactly-once idempotency deduplication, and automated Stripe webhook synchronization. Developed an automated LLM support ticket triage microservice with strict Pydantic v2 schema validation, single-repair retry loops, quarantine error logging, and dynamic kill-switch controls.		Remote Jun 2026 — Present
GenMorphics AI Solution AI Data Trainer Annotated and structured 1,000+ complex PDF documents using high-precision bounding-box spatial labeling across tables, headers, and multi-column layouts to train multimodal OCR and Document Intelligence models. Evaluated and refined 10,000+ LLM prompt-response pairs, applying strict alignment heuristics and human-preference criteria (RLHF/DPO) to boost completion accuracy by 12%.		Dhaka, Bangladesh Jan 2025 — Nov 2025
ULAB Computer Programming Club Organizing Secretary Directed club technical operations, managing intra-university competitive programming contests and mentoring 150+ student members in data structures & algorithms.		Dhaka, Bangladesh Jan 2024 — Jan 2025
TECHNICAL PROJECTS		
ROAR — Final Year Capstone Project (ULAB) Python, PEFT/LoRA, Gradio, SQLite Engineered an adaptive prompt engineering tutor using a locally quantized (4-bit NF4) DeepSeek-R1 Distill Qwen-7B base model fine-tuned via PEFT/LoRA adapters, achieving 94.2% grading alignment with human evaluators. Designed an adaptive learning state machine tracking student progress through 3 difficulty levels, providing guided templates and penalty scoring.		GitHub Repo Jan 2026 — Present
Orion — Multi-Agent Corrective RAG (CRAG) Python, Gemini API, Streamlit, Vector Search Built a multi-agent research assistant implementing the Corrective RAG (CRAG) loop to eliminate LLM hallucinations. Programmed a document relevancy evaluator using NumPy cosine similarity with a 0.75 threshold, reducing hallucination rates by 35% and maintaining retrieval latency below 120ms.		GitHub Repo Dec 2025
AeroDraw — Edge AI Gesture Controller React, Vite, MediaPipe, WebAssembly Created a client-side computer vision application enabling users to draw in the air and control interfaces via WebAssembly-based MediaPipe hand-tracking landmark vectors, rendering at a smooth 60 FPS.		GitHub Repo May 2026
OmegaNet — Neural Framework from Scratch Python, NumPy Developed a modular deep learning framework in Python, implementing vectorized NumPy matrix operations and backpropagation routines. Programmed a custom Adam optimizer from first principles, training models to achieve 98.4% validation accuracy within 45 epochs.		GitHub Repo Nov 2025
CERTIFICATIONS (CLICK TO VIEW VERIFIED CREDENTIAL)
