EDUCATION

University of Liberal Arts Bangladesh (ULAB) — **Dhaka, Bangladesh**
B.Sc. in Computer Science & Engineering (Completed) — *Jan 2022 — Sep 2026*

- **Academic Standing**: CGPA **3.10 / 4.00** (Graduated). Specializing in Artificial Intelligence, Backend AI Systems & Algorithms.

AWARDS & COMPETITIONS

Dhaka Regional Finalist | ICPC Dhaka Regional Contest — 2023, 2024
2nd Runners-up | Take-off Programming Contest Hosted By ULAB Computer Programming Club — 2023
Certificate of Participation | IUT 11th National ICT Fest — 2024

TECHNICAL SKILLS

Languages:	C++, Python, SQL, JavaScript, Java, PHP, Bash
Backend & APIs:	FastAPI, Flask, RESTful APIs, Asynchronous Python (asyncio), Uvicorn, PostgreSQL, API Integration
AI & LLM Systems:	Model Context Protocol (MCP), Agent Skills, Subagents, Claude API, Tool Calling, Agentic AI (ReAct), RAG, PEFT/LoRA
Data, Vision & Annotation:	Bounding Box Annotation, PDF Layout Analysis, Dataset Curation & RLHF, MediaPipe, WebAssembly, PyTorch, NumPy
Databases & DevOps Tools:	MySQL, SQLite, PostgreSQL, Git, GitHub Actions, Docker, Postman, Linux/Bash, Jupyter Notebook, LaTeX

PROFESSIONAL EXPERIENCE

FlyRank AI — **Remote**
Backend AI Engineer — Intern (Completed) — *Jun 2026 — Sep 2026*

- Architected an enterprise usage metering and quota enforcement engine using **FastAPI** and **PostgreSQL**, implementing exact integer micro-dollar pricing, guaranteed exactly-once idempotency deduplication, and automated Stripe webhook synchronization.
- Developed an automated LLM support ticket triage microservice with strict **Pydantic v2** schema validation, single-repair retry loops, quarantine error logging, and dynamic kill-switch controls.

GenMorphics AI Solution — **Dhaka, Bangladesh**
AI Data Trainer — *Jan 2025 — Nov 2025*

- Annotated and structured **1,000+ complex PDF documents** using high-precision bounding-box spatial labeling across tables, headers, and multi-column layouts to train multimodal OCR and Document Intelligence models.
- Evaluated and refined **10,000+** LLM prompt-response pairs, applying strict alignment heuristics and human-preference criteria (RLHF/DPO) to boost completion accuracy by **12%**.

ULAB Computer Programming Club — **Dhaka, Bangladesh**
Organizing Secretary — *Jan 2024 — Jan 2025*

- Directed club technical operations, managing intra-university competitive programming contests and mentoring 150+ student members in data structures & algorithms.

TECHNICAL PROJECTS

Project ROAR — Multi-Agent Intelligent Tutoring System (ULAB Capstone) — **GitHub Repo**
Python, FastAPI, MCP 2.x, ChromaDB, Ollama, SQLite, Docker — *Jan 2026 — Sep 2026*

- Architected a 5-agent Hierarchical Multi-Agent System (HMAS) orchestrated via **Model Context Protocol (MCP 2.x)** JSON-RPC protocol bus, achieving **0% cross-agent context drift** across Onboarding, Lesson, Quiz, Evaluator, and Hardware Scout agents.
- Built **ChromaDB RAG pipeline** indexing 1,899 vetted QA chunks, reducing hallucination rate **4.1× (24.8% → 1.2%)**; implemented 36-node Bloom's taxonomy curriculum DAG with prerequisite gate validation.
- Delivered dual-stage Evaluator Agent (regex rubric + semantic LLM judge) achieving **F_1 = 95.8%** and **Cohen's κ = 0.8963** vs senior human instructors; runs fully offline within **4.82 GB peak VRAM** with 28/28 tests passing.

Orion — Multi-Agent Corrective RAG (CRAG) — **GitHub Repo**
Python, Gemini API, Streamlit, Vector Search — *Dec 2025*

- Built a multi-agent research assistant implementing the Corrective RAG (CRAG) loop to eliminate LLM hallucinations.
- Programmed a document relevancy evaluator using NumPy cosine similarity with a **0.75** threshold, reducing hallucination rates by **35%** and maintaining retrieval latency below **120ms**.

AeroDraw — Edge AI Gesture Controller — **GitHub Repo**
React, Vite, MediaPipe, WebAssembly — *May 2026*

- Created a client-side computer vision application enabling users to draw in the air and control interfaces via WebAssembly-based MediaPipe hand-tracking landmark vectors, rendering at a smooth **60 FPS**.

OmegaNet — Neural Framework from Scratch — **GitHub Repo**
Python, NumPy — *Nov 2025*

- Developed a modular deep learning framework in Python, implementing vectorized NumPy matrix operations and backpropagation routines.
- Programmed a custom Adam optimizer from first principles, training models to achieve **98.4%** validation accuracy within **45 epochs**.

CERTIFICATIONS (CLICK TO VIEW VERIFIED CREDENTIAL)

- Backend AI Engineering (Internship) – FlyRank AI (2026)
- Intro to Model Context Protocol (MCP) – Anthropic (2026)
- Introduction to Agent Skills – Anthropic (2026)
- Claude Code in Action – Anthropic (2026)
- Claude Code 101 – Anthropic (2026)
- Foundations of Agentic AI – Hugging Face (2025)
- Building with the Claude API – Anthropic (2026)
- MCP: Advanced Topics – Anthropic (2026)
- Introduction to Subagents – Anthropic (2026)
- Claude with Amazon Bedrock – Anthropic (2026)
- AI Fluency for Builders – Anthropic (2026)
- Open Science 101 – NASA TOPS (2026)
