EDUCATION		
University of Liberal Arts Bangladesh (ULAB) <i>B.Sc. in Computer Science & Engineering (Final Semester)</i> • Academic Standing: CGPA 3.10 / 4.00 . Specializing in Artificial Intelligence, Backend AI Systems & Algorithms.		Dhaka, Bangladesh <i>Jan 2022 — Present</i>
AWARDS & COMPETITIONS		
Dhaka Regional Finalist ICPC Dhaka Regional Contest		2023, 2024
2nd Runners-up Take-off Programming Contest Hosted By ULAB Computer Programming Club		2023
Certificate of Participation IUT 11th National ICT Fest		2024
TECHNICAL SKILLS		
Languages:	C++, Python, SQL, JavaScript, Java, PHP, Bash	
Backend & APIs:	FastAPI, Flask, RESTful APIs, Asynchronous Python (asyncio), Uvicorn, PostgreSQL, API Integration	
AI & LLM Systems:	Model Context Protocol (MCP), Claude API, Gemini API, Tool Calling, Agentic AI (ReAct), RAG, PEFT/LoRA, 4-bit Quantization	
Data, Vision & Annotation:	Bounding Box Annotation, PDF Layout Analysis, Dataset Curation & RLHF, MediaPipe, WebAssembly, PyTorch, NumPy	
Databases & DevOps Tools:	MySQL, SQLite, PostgreSQL, Git, GitHub Actions, Docker, Postman, Linux/Bash, Jupyter Notebook, LaTeX	
PROFESSIONAL EXPERIENCE		
FlyRank AI <i>Backend AI Engineer — Intern</i> • Architected an enterprise usage metering and quota enforcement engine using FastAPI and PostgreSQL , implementing exact integer micro-dollar pricing, guaranteed exactly-once idempotency deduplication, and automated Stripe webhook synchronization. • Developed an automated LLM support ticket triage microservice with strict Pydantic v2 schema validation, single-repair retry loops, quarantine error logging, and dynamic kill-switch controls.		Remote <i>Jun 2026 — Present</i>
GenMorphics AI Solution <i>AI Data Trainer</i> • Annotated and structured 1,000+ complex PDF documents using high-precision bounding-box spatial labeling across tables, headers, and multi-column layouts to train multimodal OCR and Document Intelligence models. • Evaluated and refined 10,000+ LLM prompt-response pairs, applying strict alignment heuristics and human-preference criteria (RLHF/DPO) to boost completion accuracy by 12% .		Dhaka, Bangladesh <i>Jan 2025 — Nov 2025</i>
ULAB Computer Programming Club <i>Organizing Secretary</i> • Directed club technical operations, managing intra-university competitive programming contests and mentoring 150+ student members in data structures & algorithms.		Dhaka, Bangladesh <i>Jan 2024 — Jan 2025</i>
TECHNICAL PROJECTS		
ROAR — Final Year Capstone Project (ULAB) <i>Python, PEFT/LoRA, Gradio, SQLite</i> • Engineered an adaptive prompt engineering tutor using a locally quantized (4-bit NF4) DeepSeek-R1 Distill Qwen-7B base model fine-tuned via PEFT/LoRA adapters, achieving 94.2% grading alignment with human evaluators. • Designed an adaptive learning state machine tracking student progress through 3 difficulty levels, providing guided templates and penalty scoring.		GitHub Repo <i>Jan 2026 — Present</i>
Orion — Multi-Agent Corrective RAG (CRAG) <i>Python, Gemini API, Streamlit, Vector Search</i> • Built a multi-agent research assistant implementing the Corrective RAG (CRAG) loop to eliminate LLM hallucinations. • Programmed a document relevancy evaluator using NumPy cosine similarity with a 0.75 threshold, reducing hallucination rates by 35% and maintaining retrieval latency below 120ms .		GitHub Repo <i>Dec 2025</i>
AeroDraw — Edge AI Gesture Controller <i>React, Vite, MediaPipe, WebAssembly</i> • Created a client-side computer vision application enabling users to draw in the air and control interfaces via WebAssembly-based MediaPipe hand-tracking landmark vectors, rendering at a smooth 60 FPS .		GitHub Repo <i>May 2026</i>
OmegaNet — Neural Framework from Scratch <i>Python, NumPy</i> • Developed a modular deep learning framework in Python, implementing vectorized NumPy matrix operations and backpropagation routines. • Programmed a custom Adam optimizer from first principles, training models to achieve 98.4% validation accuracy within 45 epochs .		GitHub Repo <i>Nov 2025</i>
CERTIFICATIONS (CLICK TO VIEW VERIFIED CREDENTIAL)		
- Building with the Claude API — Anthropic (2026) - MCP: Advanced Topics — Anthropic (2026) - Claude Code 101 — Anthropic (2026) - Introduction to Claude Cowork — Anthropic (2026) - AI Capabilities & Limitations — Anthropic (2026) - Foundations of Agentic AI — Hugging Face (2025) - Supervised ML: Classification — Coursera (2024) - Intro to Model Context Protocol (MCP) — Anthropic (2026) - Claude Code in Action — Anthropic (2026) - Claude Platform 101 — Anthropic (2026) - Claude 101 — Anthropic (2026) - AI Fluency: Framework & Foundations — Anthropic (2026) - Advanced Learning Algorithms — Coursera (2024) - Unsupervised Learning & Recommenders — Coursera (2025)
